

Protection occupation guide

Occupation class guide for use with: Income Protection+,
Living Costs Protection

Total permanent disability & waiver of premium guide for:
Life Insurance+, Critical Illness+, Business Life Insurance Options and
Relevant Life Insurance

Introduction

Occupation is one of the risks we assess as part of our underwriting process when your client applies for protection. The price your client pays for income protection will depend on their occupation. Occupation will also determine acceptability for total permanent disability (TPD) and waiver of premium for Life Insurance+, Critical Illness+, Business Life Insurance Options, and Relevant Life Insurance (TPD only). It also determines the definition of disability at the point of claim.

Income Protection

To make the underwriting process easier for you and your client, we've developed this guide to explain:

- how we determine the risk of an occupation
- how we assess an occupation
- what our occupation classes are
- what our definition of incapacity is
- what happens if your client isn't working when they're incapacitated
- how much benefit your client will get
- how we calculate your client's normal earnings.

We've also included a list of occupation classifications which you can use to make sure the illustration you give your client reflects their occupation correctly.

If you need more information about our income protection policies, please read the relevant policy conditions document.

How we determine the risk of an occupation

It's important that our underwriters understand the nature of your client's occupational duties. Whilst the occupation classification list provides you with a good starting point, there can be other risks specific to your client's job that we'll need to take into account.

So we need to know:

- if your client performs any manual duties as part of their occupation and whether they need any special skills
- if your client works at heights, underground, offshore, at sea or underwater
- if your client works with hazardous chemicals, explosives or machinery
- if your client's occupation involves overseas business travel
- your client's annual business mileage.

Speak to our underwriters

We've tried to give you the information you need to understand our underwriting process. However, we can't cover every scenario in this guide. So if you're not sure how we'll assess your client's occupation, please call our underwriters on 0800 533 5192.

Applying for cover

As long as your client is working in one of the occupations we cover, it doesn't matter if they are employed or self-employed, or they work full or part-time. We'll still consider their application for income protection. If your client is applying for Income Protection+ we won't place any restriction on the number of hours your client works each week if they're part time. However, if your client is applying for Living Costs Protection they need to be working at least 16 hours a week.

How we assess an occupation:

- Business mileage – if your client drives more than 25,000 business miles a year, their occupation class will be at least Class 2. If they drive more than 40,000 miles a year, it will be at least Class 3.
- Doctors and surgeons – if your client is a doctor, their occupation class will be Class 1. If they are a surgeon or psychiatrist, it will be Class 2.
- Dual occupations – if your client works in two occupations, they need to be unable to perform both before they can make a claim. If your client is unable to perform only one of their occupations when they make a claim then we may be able to make a partial payment of benefit. Our underwriters will consider the risk of both occupations when they assess the occupation classification. If your client does an occupation that forms less than 10 hours of their average working week, this will be ignored at the point of claim for determining incapacity for Income Protection+.
- Overseas travel – if your client's occupation involves overseas travel, we may need to increase the occupation class. We'll take the type of occupation, duration, purpose of visits and countries visited into account. When assessing travel outside of the EU, North America, Australia or New Zealand, we'll also take the travel recommendations of the Foreign & Commonwealth Office into consideration.
- Oil and gas workers – we'll only cover your client if they work in the oil and gas industry within the EU, North America, Australia or New Zealand.

Residency

At the time of completing the application the person covered must meet our residency criteria, which is:

'To apply for this policy the person covered must:

1. be currently physically living in the UK, the Channel Islands, the Isle of Man or Gibraltar; and
2. regard the UK, the Channel Islands, the Isle of Man or Gibraltar as the location of their main residence; and have no current intention of moving outside of any of those territories permanently; and
3. either
 - a. be a citizen of that territory or a British Overseas Territories citizen, or
 - b. have been granted permission to settle permanently in the named territory, or
 - c. be applying for a mortgage on a residential property which is, or will be, their main residence in that territory.

The person covered needs to tell us if they move outside of the UK, the Channel Islands, Isle of Man or Gibraltar, and their main residence is in another territory. We may need to change, reduce or remove any of their policy terms. We'll give the person covered details once they've told us. The person covered should seek their own independent advice if they wish to continue with their policy after they move to another territory.

Occupation classifications

To help us determine the risk of an occupation, we use four classifications:

- | | |
|---------|---|
| Class 1 | Professional, executive, managerial, clerical, administrative, office duties. No/little travel involved as part of the job. |
| Class 2 | Skilled occupations involving a moderate degree of manual duties and semi-skilled occupations that involve a limited degree of manual duties. Travel may be a feature of the job. |
| Class 3 | Skilled occupations involving mostly manual duties and semi-skilled occupations that involve a moderate degree of manual duties. |
| Class 4 | Semi-skilled occupations where duties are mostly manual and some unskilled occupations where the hazards are acceptable. |

We may apply some restrictions to occupations. For example, the maximum age for anyone working in an occupation in classes 3 or 4 is 65. And the minimum deferred period for all occupations in class 4 is 13 weeks.

There are a number of occupations where we consider the risk to be too great for us to offer income protection cover.

Definition of incapacity

We want your clients to understand how we'll assess their inability to work in the event of a claim. So we just use an 'own occupation' definition of incapacity:

We'll pay the income protection benefit if the person covered by the policy was working in a full or part-time occupation immediately before the start of the incapacity, and, as a result of the incapacity, they are:

- unable to perform the activities or tasks of their occupation either on a full or part-time basis; and
- are not working in any other occupation.

'Occupation' means a trade, profession or type of work undertaken for profit or reward. It isn't a specific job with any particular employer and is independent of location.

What happens if my client isn't working when they are incapacitated?

We won't be able to provide cover if your client isn't working – or is a house person – when they apply for income protection.

However, we know that things may change after your client has taken out a policy so there maybe a period of time when they aren't working. For example, they may be raising a family or caring for a sick relative. Or they may be made redundant or decide to take a career break.

Income Protection+

If this happens and your client isn't working – or is a house person – immediately before they are incapacitated, we'll assess them on an 'own occupation' definition for the job they were doing before they stopped working.

If they become ill or have an injury within three months of being made redundant, or are on maternity, parental or adoption leave (up to 52 weeks from the child's date of birth or legal adoption), we will treat their claim as if they were still working.

If there is an extended period where the customer is not working then restricted benefit will be paid. This means we will pay benefit for a maximum of 12 months. Your client will not be able to make a further claim on the policy until they have returned to work for at least six consecutive months.

Living Costs Protection

If you client becomes ill or has an injury whilst they are on maternity, parental or adoption leave (up to 52 weeks from the child's date of birth or legal adoption) they can claim benefit. We'll assess them on an 'own occupation' definition for the job they were doing before they stopped working.

We'll pay benefit for a maximum of 12 months. Your client will not be able to make a further claim on the policy until they have returned to work for at least six consecutive months.

If your client is unemployed or working less than 16 hours a week immediately before they become ill or have an injury they will be unable to claim on the policy.

How much benefit will my client get?

Income Protection+ only

We'll pay 65% of the first £60,000 of their gross earnings, and 45% of any gross earnings above £60,000 up to a maximum benefit amount of £240,000* a year (£20,000 a month).

If your client gets any income from other sources, we'll take it off the amount we'll pay.

Income from other sources includes:

- continuing income from a business or employer net of any tax
- income from a pension which is first paid after incapacity
- other insurance benefits paid due to incapacity that either make payments to your client or make regular payments on their behalf, such as mortgage payment protection, loan or credit card protection, pension premium protector.

* If your client chooses to increase their benefit each year through the increasing cover option the amount we pay can exceed the maximum of £240,000 (£20,000 a month).

Living Costs Protection only

If your client has a Living Costs Protection they can choose a monthly benefit of between £500 and £1,500. We won't ask what their earnings are and we won't take income from other sources off the amount we'll pay.

How long can the policy last?

Income Protection+ and Living Costs Protection must be taken out for a minimum of five years and can be taken out to a specific age. This ranges from age 50-70, although there are some restrictions for certain occupations and these are shown in the occupation classification list below. Therefore, if a 35 year old client takes a policy out until age 65, their policy will end at midnight on the day before their 65th birthday.

The policy can also be taken out for a specific term. Therefore, if a 35 year old client takes out a policy for a 30 year term, their policy must end at midnight on the day before their 66th birthday.

Arrangements for NHS doctors, surgeons, nurses and midwives

If your customer is an NHS doctor or surgeon registered with the General Medical Council or an NHS nurse or midwife registered with the Nursing and Midwifery Council then they need to set up their Income Protection+ policy on a single deferred period of 52 weeks. If they are on the full allocation of sick pay from the NHS they still need to set their policy up with a single 52 weeks deferred period.

They need to be employed directly by the NHS and if they work for a practice they will need to set up their policy with the relevant deferred period(s) in line with their sick pay from the practice.

In the event of a successful claim benefit will be paid when their sick pay from the NHS stops or reduces, regardless of the fact that they have a 52 week deferred period on their policy. We take into account any sick pay they receive from the NHS so when they are receiving half pay from the NHS they will receive some benefit from us as well. Full details of our benefit calculation is shown in the policy conditions.

How do you calculate normal earnings if my client is employed?

Income Protection+ only

We'll use your client's gross earnings, salary or wage from their employment in the 12 months immediately before their incapacity. This can include income from other sources such as dividends, bonus, commission, and benefits in kind.

If your client's income includes company dividends, we'll include them as part of their normal earnings as long as:

- paid from a private limited company that your client is a full time working director of; and
- paid to your client instead of regular salary in the 12 months, immediately before incapacity; and
- consistent with the level of regular salary which the paying company's trading position reasonably allows on a continuing basis; and
- paid from the net trading profit of the business and not retained profit.

We'll also consider your client's spouse's or civil partner's dividends if:

- the spouse/civil partner does not contribute to the profit of the business
- the share of the dividends will stop if your client is incapacitated
- the share of the dividends is not covered by any other insurance.

How do you calculate normal earnings if my client is self-employed?

Income Protection+ only

We'll use your client's gross personal income from their business in the 12 months immediately before their incapacity. This means your client's share of the pre-tax profit after expenses. Often this is their share of the business net profit.

Total permanent disability

This benefit is available at an extra cost with Life Insurance+, Critical Illness+, Business Life Insurance Options and Relevant Life Insurance.

Your clients occupation and health at the time of application will determine which definition they receive, either:

- own occupation – unable before age 71 to do their own occupation ever again; or

- activities of daily work – unable before age 71 to perform three specified work tasks ever again.

For full details, please see the relevant policy conditions.

Waiver of premium

This benefit is available at an extra cost with Life Insurance+, Critical Illness+ and Business Life Insurance Options.

With waiver of premium we pay the premiums if your client can't work due to illness or injury, so that cover can be maintained.

We apply a deferred period during which time the policy holder must continue to pay premiums. When the deferred period ends, we'll start paying the premiums.

Some occupations have a minimum deferred period – those affected are the same as for Income Protection+ and so deferred periods under occupational class also apply for WOP.

Note: Waiver of Premium is included on all Income Protection+ and Living Costs Protection policies.

Occupation classification list

Note: Occupation class applies only to Income Protection+ and Living Costs Protection.
