

MyAviva is all about making life easier for you and your clients. It's beautifully simple.

A quick log-in to their account – and your client can see their policies... together, in one place. Free, easy, and secure.

One click and they can view their documents, instead of having to search through drawers or to call your office.

It's straightforward... and brilliantly convenient for your client.

Another click and they can find out how much insurance cover they have, or what their pension or investments are worth – and where their money's invested.

With MyAviva, it's all right there in front of them – just like checking a bank balance online.

And if they want to, it's easy to make changes to their personal details, too – like a new email address, or if they're moving home.

Just a few clicks, and the job's done. Smart and simple.

All of this means you get to spend less time dealing with basic enquiries, and more time doing what you're best at. Good news for everyone.

MyAviva is the easy way for your clients to access their policy information – wherever they are, whenever they like.

Our research shows customers who use it are more satisfied. And it's safer and more secure than email or print.

We all want to live a life that's less complicated. And with MyAviva, everything just clicks.
