

Hospital Lists

Hospital Lists

With Aviva it's reassuring to know that you'll have access to the medical care you need when you need it most.

This booklet details the various hospital lists available. Not all of the hospital lists are available on our products so please check your policy documentation to see the hospital list that applies to your policy, giving you access to hospitals who are able to offer a comprehensive range of treatments. Each hospital list is colour coded.

You should always telephone our customer service helpline prior to receiving any treatment to confirm that the hospital is recognised by us to provide the type of treatment you require and for the condition that requires treatment.

Please be aware that out-patient CT, MRI and PET scans will only be covered at a diagnostic centre.

NETWORKS

To help manage costs and drive consistent quality of care, we're developing a number of networks of facilities, specialists and other practitioners for specific conditions

If your treatment is for a condition that we've a network for, we'll only pay for that treatment if it's carried out at a facility and/or under the care of a specialist (or other practitioner) recognised by us as part of that network.

If you have the Extended hospital list, you don't have to use our networks

A list of the conditions or suspected conditions for which we have networks in place can be found at aviva.co.uk/health-network

If we don't have a network for your condition or suspected condition, or if you have the Extended hospital list, you can have out-patient treatment at a hospital not on your list but that is recognised by us, and we'll pay in full. However, in-patient and day-patient treatment will only be covered, in full, at a hospital that's included on your hospital list and recognised by us, for the treatment that you need

If you have in-patient or day-patient treatment at any other hospital recognised by us, we'll calculate the average cost of equivalent treatment across all hospitals on your list, and that average cost is the maximum we'll pay. This could leave you with a shortfall that the policy doesn't cover. If the actual cost of the treatment is less than the average cost, we'll pay the hospital costs in full.

If you receive treatment in a hospital that isn't recognised by us, we won't pay any hospital fees for your treatment.

Key Hospital List

This list indicates the private and NHS hospitals most frequently used by people with medical insurance. Many of the NHS hospitals listed have dedicated private patient units. Please check the facilities that will be made available to you. In addition to the hospitals shown on this list, your policy also gives you access to some NHS pay-beds recognised by us. Altogether this will give you access to around 800 hospitals countrywide.

Information for members of corporate schemes

Your member documentation will detail which hospital list applies to you.

If you are a member of a GuideWell scheme, these hospital lists do not apply and you should contact the customer service helpline to find out where you can have your treatment.

If you're unsure what your scheme type is then please contact our customer service helpline.

Extended Hospital List

This increases the number of hospitals you have access to, predominantly in the Greater London area.

Fair+Square Hospital List

A network of hospitals from some of the largest private hospital providers in the country.

Trust Hospital List

The hospitals listed offer dedicated private patient units with comfortable accommodation, normally including a single room with en suite bathroom facilities.

Trust Approved Hospitals are sometimes single-specialty hospitals. For example they may offer only cancer treatment or only cardiology. If you choose the Trust list, please check to ensure that as well as there being a hospital local to you, it is one which will be able to offer treatment for a range of conditions.

S indicates those hospitals on the Trust List of Approved Hospitals which are single specialty hospitals.

In addition to the hospitals on the Trust List you can also use any other NHS hospital agreed in advance with us for in-patient and day-patient treatment. However, please note that these hospitals may not have dedicated private patient facilities, and may not be able to offer single or en suite accommodation, prompt admission or direct settlement of accounts. It's recommended that you confirm with your specialist prior to admission what standard of facilities are likely to be available to you at non-listed NHS hospitals.

Out-patient Treatment

If you require out-patient consultations, tests or treatment covered by the policy, and they're not available at a Trust hospital, you are not restricted by the Trust List and may use any private hospital or consulting room agreed with our customer service team. This does not apply to CT, MRI or PET scans which are only covered at a diagnostic centre.

Signature Hospital List

This list is available for customers living in Scotland or Northern Ireland.

In addition to these hospitals you are also covered to use NHS pay-beds that are recognised by us in Scotland or Northern Ireland.

Children

Not all of the private hospitals listed are able to admit children for private treatment, although some NHS hospitals are able to do so. Please contact us if you've any queries about cover for your children on your policy.

Call us

You should always telephone us prior to making a claim providing details of your policy number, symptoms or condition so that we can check that the treatment and costs will be covered under your healthcare policy.

Sound Advice

We strongly recommend that you refer to this list and your terms and conditions before going to see your GP. If they need to refer you to a specialist, call us so we can confirm whether we recognise that specialist for the treatment that you require.

If you have an open referral, with no specialist name, we can help to name the specialists in your area that work out of a hospital on your list. This sometimes means you can get an appointment quicker, as you can arrange an appointment with the specialist that can see you at a time that suits you.
