

Aviva Longevity video script

Hello. There's someone you really should meet...

You'll need this.

This is Future You.

The first thing to note about Future You is that, happily, he's still here.

Did you know that 4 out of 5 people underestimate their life expectancy?

That's something to consider if you're reviewing your pension contributions – or thinking about taking cash from your pension fund.

Some people find retirement is better for them than they thought.

For instance, you could have a lot less stress in your everyday life

And more time to look after yourself.

More time for other things too...

Like thinking carefully about your options for accessing your pension fund and how long your money might need to last

Of course, you don't have to wait until you're retired to do some thinking on that subject...

Be seeing you later then...
